

Introduction: Software Engineer with expertise in Full Stack Web Development, specializing in MERN stack. I bring a blend of technical expertise with creative problem-solving techniques. Hands-on experience on numerous full stack projects. These projects have honed my technical skills with valuable insights into the core of web development. Impactful contributions that takes company to new heights.

Languages and Technologies

- ReactJs, NextJs, Tailwind CSS, Bootstrap, Typescript, Git, Github, NodeJs ,ExpressJs , MongoDB , PostgreSQL
- Visual Studio Code, Postman, MongoDB compass.

EMPLOYMENT

Software Engineer, Associate	Jangobyte Innovations	Aug 2023 – March 2024
<ul style="list-style-type: none">• Developed and maintained web applications using React.js and Node.js technologies• Collaborated with cross-functional teams to deliver high-quality software solutions• Utilized React and Node.js for frontend and backend development respectively• Integrated APIs and conducted API testing• Built logic and managed state using Context API and Redux Toolkit• Created user-friendly interfaces using Bootstrap, Tailwind, SCSS, Chakra UI, and Material UI• Played a crucial role in developing backend systems for various web applications• Followed MVC pattern for developing APIs using Express• Managed cookies and implemented JWT for authorization and authentication• Assured high-end web solutions as a full-stack developer		
Software Engineer, Intern	Wapda Town	March 2023– April 2023
<ul style="list-style-type: none">• Designed and implemented dynamic forms using Formik and Yup.• Enhanced user interaction and data input validation through Formik implementation.• Integrated React Bootstrap modals into the application interface.• Provided users with interactive and visually appealing modal dialogs for actions like data entry or confirmation prompts.		

EDUCATION

Lahore, Pakistan	University of Central Punjab	Fall 2019 – Spring 2023
<ul style="list-style-type: none">• Bachelors of Science in Software Engineering, July 2023.• Skills: Project management, leadership, UML modeling.		
Lahore, Pakistan	Govt. College Gulberg	2017 – 2019
<ul style="list-style-type: none">• Higher Secondary School Certificate - FSC (Faculty of Science) Pre-engineering.		
Lahore, Pakistan	Allied School	2015 – 2017
<ul style="list-style-type: none">• Secondary School Certificate – Science Group.		

TECHNICAL EXPERIENCE

Projects

- **Multiverse Ecommerce.** My role involve architecting and implementing backend infrastructure using Express Js integrating Cloudinary, integrating JWT tokens for enhanced authentication and security Protocols. On the Frontend my focus on API integration, data retrieval, mutation operation using React-query alongside state management using redux toolkit (React-Query, Hooks, redux-toolkit, react-router-dom, cache management, API Integration, JSON Web Token, Bcrypt, node-mailer, Multer, Cloudinary)
- **Travelholic Multi-vendor site.** Full Stack Web based Application Targeting Travel and Tourism Industry. (React Hooks, Bootstrap, API Testing, File Handling, Multer, Cloudinary, NodeJs,MongoDB)
- **Vista Blog.** Developed using NodeJs and MongoDB, utilized ExpressJs for API routing and Multer for file handling. (NodeJs, ExpressJs, Multer, MongoDB).
- **Hosterr Landing Page.** PNG to Next JS and Tailwind CSS, responsive design without any css Styling. (NextJs, Tailwind CSS)
